Projects Handled

WEBSTER AUTOMATED COLLECTION OF DOCUMENTS - Webster University

Designed a framework system to replace manual collection of documents from teachers to the admin department.

This also included an automated alert system to remind teachers about submission deadlines.

MIS for UPPPTDP - IPE Global

I contributed to the development of the MIS for this project. I designed the user interface, database connectivity and delivered a presentation to the client.

Technical Documentations - ICS Addis Ababa

Developed illustrated user guides about operating systems, wireless connectivity and printers.
